# PT45

The PowerTurf (PT45) product is designed with 5-a-side Football in mind. Using special yarns with a higher dtex and a thicker tape, it is a lot more durable than the standard football yarns. Where FIFA Quality standards are achieved after 20,000 cycles on the Lisport, these special yarns still look good and performs well after 100,000 cycles. With 5-a-side facilities being used 24/7 all year round then we are confident that our PowerTurf range provides **STRENGTH IN PERFORMANCE** play well in excess of 5 years.
