VT40

A British designed turf system inspired by the professional football game and originally installed by Chelsea Football Club at their training facility in Cobham, London. Meeting FIFA Quality Pro international standard with suitable shockpad and great for 5-a-side football without a shockpad it is the aspirational product of all professional football clubs. Using the innovative Rhino-Turf Thatch Concept we have a fully integrated RootZone protection for the profiled monofilament yarn fibres, offering infill stability leading to infill splash reduction which results in less infill migration and a more uniform playing field. A SAFER system with **STRENGTH IN PERFORMANCE**.
